Sir,

As the eligibility criteria of the internship say, it requires good knowledge of Java and its frameworks. I am sure that I can do well in this internship period. I started my coding journey in C++ and then learned Java and build projects in it. My consistency and quick learning skills will provide value to your organization. I believe that we learn each day and thus I am open and curious to learn a lot by being a part of your organization. Furthermore, I am also building projects in machine learning and learning new technologies. Hope you like my work I am looking forward to hearing from you!!

Sincerely,

GAURAV KASHYAP
